

Software Concussion Management Tool

Built for Neurosurgery, Orthopedic & Sports Medicine Practices

- ✓ Monthly Neuropsychology Assessments
- ✓ Weekly Digital Symptom Tracking
- ✓ Computerized Cognitive Therapy
- ✓ Comprehensive Evaluations

Why Orthopedic Practices Should Add a Concussion Program

- Capture **post-injury concussion cases** already entering your practice
- Provide **structured 12-week recovery pathway**
- Improve outcomes with objective neurocognitive data
- Differentiate your practice in sports & trauma markets

Revenue-Generating, Fully Billable Workflow Initial Visit

- E&M Coding
- Neuropsychology Testing

Feedback Visit

- Neuropsychology Interpretation

Ongoing Care

- Digital Monitoring
- Cognitive Remediation therapy
- Re-evaluation every 12 weeks

What This Means for Your Practice

- Creates **recurring patient engagement**
- Adds structured concussion specialty service line
- Expands scope without hiring full-time Neuropsychology staff
- Improves compliance, documentation, and defensibility

Software automates patient engagement through digital tool that generate billable reports with outcome data.
